Dirt Pad

End-Wall Close Up:

Lot Clearing

Set:

Demolition

HVAC:

Driveway

Plumbing:

Culvert

Electrical:

NOTES ABOUT MODULARS:

1. **Please attach a MOD pack (and/or i-beam schematic), floor plan, and map to this form.**
2. An outside perimeter is automatically included in the estimate. If the engineer's design comes back without one, that cost will be taken off your invoice. *Most Modular foundations require the perimeter.*
3. VLS automatically orders the por-pour inspection at the time of installation. We can order the set and final inspections for our customers. Please be advised that we are not responsible for the outcome of those inspections and will not perform repairs on items we were not originally hired to do.
4. Any fees for re-inspections, paperwork changes, or fines for late inspections(set & final) will be passed on to the retailer.

Forms can be emailed to: info@voylesservices.com
